## Schedule "A"

Licensee: LAFARGE CANADA INC.

Licence Reference # 45822

This licence is subject to the prescribed conditions that apply to Category 3 Licences as outlined in the Aggregate Resources of Ontario Provincial Standards and are described as follows:

- Dust will be mitigated on site.
  - Water or another provincially approved dust suppressant will be applied to the internal haul roads and processing areas as often as required to mitigate dust.
  - Processing equipment will be equipped with dust suppressing or collection devices, where the equipment creates dust and is being operated within 300 metres of a sensitive receptor.
  - Any recommendations and/or recommended monitoring program identified in the technical reports will be described on the site plan and all records will be retained by the licensee and made available upon request by the Ministry of Natural Resources for audit purposes.
  - A Spills Contingency program will be developed prior to site preparation.
  - Fuel storage tanks will be installed and maintained in accordance with the Gasoline Handling Act.
  - If required, a Certificate of Approval will be obtained for the discharge system, should water be discharged off site.
  - If required, a Certificate of Approval will be obtained for processing equipment to be used on site, prior to the operation of the plant.
  - If required, a Permit to Take Water will be obtained for utilizing ground and/or surface water.
-
